

GINGER SN

The Choice For maximizing Oval Optics

GINGER SN (Short Nose) is a special version of Ginger, a line of spotlights affording a small and slick design and leading-edge technology, for the Specific Use of Oval optics & Outdoor Up-light Lighting.

GINGER SN is a free-standing spot fixture, having a smart base that allows the fixture to be adjusted vertically. Although it is small in size, it affords a mighty light output of 216lm (3000K 80CRI), thanks to the new Luxeon Z-ES LED.

Unlike **GINGER** with its dark-light design, the **GINGER SN** is a perfect match for up lights and for Oval Optics when quality and accuracy are important and wide oval lenses are essential.
